

wacom version 1.1

Max/MSP 4.3 (Windows)

by Olaf Matthes

By using this software you are agreeing to the software license at the end of this document.

This software is copyright © 2005 by Olaf Matthes. All rights reserved.

Wacom is a registered trademark of Wacom Company, Limited.

System Requirements:

This software is for use with Max/MSP 4.3 (and probably later). This release is designed for use with the Windows version of Max 4.3. It will not work with Max/MSP for Mac.

Your tablet driver has to support the WinTab library. Most tablet drivers fulfil this requirement. Tested tablets are several Wacom tablets and a Acecad ACECAT Flair serial tablet. Both USB and serial tablets are supported as long as there exists a Windows WinTab-capable driver for your tablet.

Copy the file 'wacom.mxe' from 'build-win' folder into the externals folder of your Max distribution. Copy the help patch (*.help) into the max-help folder of your Max distribution.

Usage:

To get access to your tablet make sure to have the latest drivers installed. There are no additional settings required in order to get this object working. However, it is important to note that you can only use one instance of this object accessing a particular tablet at a time. In case two wacom object try to access the same tablet only the object's instance that was created last will be working! However, you can use the 'setfront' message to determine which instance should receive the data. See the help patch for detailed information on how to use this object.

My Max/MSP web page, from which these object may be downloaded, is located at:

License Agreement

The Software is provided by Olaf Matthes (hereinafter referred to as the "AUTHOR"), free of charge and may be distributed free of charge, provided that this documentation is included unchanged with the software. You may not sell the software, nor may you take a fee or commission for providing the software to another person, nor may you include the software with or as part of other software that is sold for a fee without prior written permission from the Author. Source code for the software, if provided, can be re-used for educational or non-commercial purposes provided the Author is credited both in the product source and in the final product. The source code for this software may not be re-used for commercial purposes without negotiating and obtaining a commercial licensing agreement from the Author. For the case, that this software voids any patents, the user has to delete the program and any copies by himself or on request of the Author.

Currently, this software needs to be registered with the author, Olaf Matthes, to be used, use of this program is illegal if you are not registered. Please note, that currently this program can only be used for research and experimental purposes and not for commercial use of any kind. If this program is used without registration or after the erasure request, the user is responsible for the illegal use of the program and agrees that any legal actions against the author will be redirected to himself (the user) without contradiction.

Disclaimer of Warranty on Software

The software is provided "AS IS" and without warranty of any kind. The Author expressly disclaims all warranties, express or implied, including, but not limited to, the fitness for a particular purpose. The Author does not warrant that the software will be uninterrupted or error-free, or that defects in the software will be corrected. Furthermore, The Author does not warrant or make any representations regarding the use or the results of the use of the software in terms of their correctness, accuracy, reliability, or otherwise. No oral or written information or advice given by the Author shall create a warranty or in any way increase the scope of this warranty. Should the software prove defective, you (and not the author) assume the entire cost of all necessary servicing, repair or correction of the software, or the computer system with which it is used.

Limitation of Liability

Under no circumstances, including negligence, shall the Author be liable for any incidental, special, or consequential damages that result from the use or inability to use the software, even if the Author has been advised of the possibility of such damages.
